NEXABANK / SYNTHETIC TRAINING CORPUS

NexaFlex Personal Loan

A practical guide to unsecured lending and prepayment rules

NexaFlex is the fictional bank's unsecured fixed-rate personal loan. This guide turns the controlled policy into customer-facing explanations, screening examples and precise charge calculations.

INSIDE THIS GUIDE

07-08 Detailed reference tables

Source documents: POL-PL-V1 (effective 2024-01-01); POL-OPS-001

Illustrative content only. Not a real bank, financial advice, or a policy override.

Product scope and dates

Explain the purpose before quoting a number.

Permitted scope

- NexaFlex is an unsecured, fixed-rate loan for personal needs. It is not for speculative, capital market or illegal end use.
- There is no collateral and no loan-to-value rule. Do not import mortgage or vehicle-security rules from other products.

Policy timing

- POL-PL-V1 has been effective since 2024-01-01 and is the first and only issue in the controlled corpus.
- The version in force on the sanction date governs the loan. The corpus supplies no NexaFlex policy before 2024-01-01.

What to capture

- Before an indicative screen, collect age, employment type, verified income, Bureau Score, existing monthly obligations, proposed EMI, amount and tenure.
- If income is self-declared or under review, say verification is pending; ask for suitable supporting documents and avoid a decision statement.

NexaFlex differs from the other lending products in the corpus because it is unsecured. It has no vehicle hypothecation, property mortgage or LTV calculation, and the assistant should not ask for collateral as though it were part of this policy. The loan is for personal needs but expressly excludes speculative, capital-market and illegal end uses. Clarify the customer's stated purpose before walking through amount and pricing. The policy has been effective since January 2024 and is the first issue in the controlled set. The sanction date identifies the governing version, but the corpus does not provide a NexaFlex policy for an earlier hypothetical date. A customer-facing explanation should remain grounded in the available policy rather than inventing historical terms. Collecting age, employment type, verified income, obligations, score, desired amount and tenure gives enough information for an indicative published-criteria check, never a credit approval.

Eligibility and FOIR

Published criteria support an indicative check, not an approval.

Age and income

- Age at application is 23-58 years. Age at maturity must not exceed 60.
- Salaried net monthly income must be at least ₹25,000. Self-employed annual income must be at least ₹3,00,000 on the latest return.

Score, amount and tenure

- Minimum Bureau Score is 700; below that, the applicant is not eligible under standard criteria.
- Loan amount is ₹50,000-₹25,00,000. Tenure is 12-60 months.

FOIR example

- Total monthly obligations, including proposed EMI, must be no more than 50% of net monthly income.
- If income is ₹50,000, existing obligations ₹8,000 and proposed EMI ₹15,000, FOIR is ₹23,000 / ₹50,000 = 46%. State only that the example meets this published threshold.

NexaFlex's age gate has two parts: the applicant must be 23-58 at application and no older than 60 when the loan matures. A proposed five-year tenure can fail the second test for someone who passes the first. The stated income threshold also depends on employment type: salaried applicants are assessed against a net monthly amount, while self-employed applicants use annual income shown in the latest return. The minimum Bureau Score is 700 under standard criteria. FOIR includes the new EMI and all existing fixed monthly obligations and cannot exceed 50% of net monthly income. A transparent example states the income, old obligations and proposed EMI before presenting the ratio. It should then say only whether this one published threshold is met. Amount, tenure, KYC and verification still matter, and NexaAssist cannot turn any combination of preliminary checks into a final credit decision.

Rates and fees

NexaFlex pricing is fixed and score based.

Fixed annual rates

- Bureau Score at sanction sets the rate: 800-900: 11.50%; 750-799: 13.25%; 725-749: 15.00%; 700-724: 17.50%.
- The rate is fixed for the loan tenure and is not linked to NRLR or another benchmark. An NRLR movement does not change it.

Processing fee example

- Processing fee is 2.00% of sanctioned amount, minimum ₹2,000, with no maximum, plus 18% GST.
- For a ₹5,00,000 sanction, fee is ₹10,000 and GST is ₹1,800, total ₹11,800. For a ₹50,000 sanction, the ₹2,000 minimum applies before GST.

Late EMI charge

- An overdue EMI attracts 2.00% per month on the overdue EMI, minimum ₹500 per instalment, plus GST.
- Example: for a ₹12,000 overdue EMI, 2% is ₹240; minimum ₹500 applies and GST adds ₹90, totalling ₹590.

The NexaFlex interest rate is fixed for the full tenure and selected by the Bureau Score at sanction. Its four bands range from the highest-score 11.50% rate to 17.50% for scores 700-724. The product is not linked to NRLR, so a change in that benchmark does not by itself reset this rate. The processing fee is 2% of the sanctioned amount with a ₹2,000 minimum and no maximum, then 18% GST. That absence of a maximum is important when explaining a larger loan: do not import the caps used by other products. For an overdue instalment, the late charge is 2% per month on the overdue EMI, with a ₹500 per-instalment floor and GST. The three numbers serve different purposes: interest prices the loan, processing fee is collected on sanction, and a late charge arises from an overdue EMI.

Security and documentation

Avoid adding requirements the policy does not state.

No collateral

- NexaFlex is an unsecured loan. No mortgage, vehicle hypothecation, property valuation or LTV limit appears in its policy.
- An advisor should not ask a customer to provide property or car security as a NexaFlex policy condition.

KYC gate

- POL-PL-V1 requires verified KYC for sanction and disbursal under POL-OPS-001.
- If KYC is re_kyc_due, new credit sanction and disbursal are held until completion. If expired, new applications are on hold and disbursal blocked. If incomplete, credit applications are not accepted.

Income verification wording

- The operations policy distinguishes verified, itr_verified, self_declared and mismatch_under_review income statuses.
- For self_declared or mismatch_under_review, say income verification is pending and identify helpful documents such as salary slips, Form 16, latest return or six months of statements.

Because the loan is unsecured, there is no collateral value against which to calculate LTV. That does not make the loan documentation-free. The product policy expressly requires verified KYC before sanction and disbursal, and the operations policy describes what each KYC status means. A re-KYC-due state allows existing services to continue but holds new credit sanction and disbursal until completion. Expired KYC holds new applications and blocks disbursal; incomplete KYC permits only basic savings features and prevents a credit application being accepted. Income verification is a different track. A self-declared or mismatch-under-review status calls for an honest explanation that supporting income evidence is still pending. Salary slips, Form 16, a latest return and six months of statements are examples of helpful documents. The assistant must not recast an unresolved verification state as an approved or rejected application.

Lock-in and prepayment

Count paid EMIs before explaining the permitted action.

Six-EMI lock-in

- No prepayment or foreclosure is permitted before 6 EMIs have been paid.
- The policy states a paid-EMI condition, so do not replace it with an elapsed-month assumption.

Foreclosure after lock-in

- After the lock-in, foreclosure charge is 4.00% of outstanding principal plus GST.
- If outstanding principal is ₹4,00,000, the charge is ₹16,000 and GST ₹2,880, totalling ₹18,880.

Part prepayment after lock-in

- After the lock-in, part prepayment is allowed with a minimum of one EMI. Charge is 4.00% of the amount prepaid plus GST.
- On a ₹1,00,000 part prepayment, charge is ₹4,000 and GST ₹720, totalling ₹4,720. Check the one-EMI minimum separately.

The policy's lock-in is defined by six EMIs actually paid, not by the passing of six calendar months. Before that condition is satisfied, neither part prepayment nor foreclosure is permitted. After it is satisfied, the two actions carry different bases for a 4% charge: foreclosure uses outstanding principal, while part prepayment uses the amount prepaid. GST is additional in both cases. A part prepayment must also be at least one EMI. Therefore a reliable answer checks the paid-EMI count, identifies whether the customer wants to close the loan or reduce it, verifies the relevant amount and applies the correct base. Quoting a charge before checking the lock-in could mislead a customer into thinking the transaction is already allowed. Likewise, calculating foreclosure on the original principal or a partial prepayment on the remaining balance would inflate or distort the published charge.

Advisor Q&A and source map

Keep the customer answer accurate, limited and useful.

Can I prepay after five EMIs?

- No. The published lock-in ends only after 6 EMIs have been paid. Once that condition is met, the published foreclosure or part-prepayment charge applies.
- Do not promise a waiver; send any waiver request to a human officer.

Why is there no LTV?

- LTV compares a loan with collateral value. NexaFlex takes no collateral, so its policy states that LTV rules do not apply.
- The absence of collateral does not remove income, score, FOIR or KYC requirements.

What can NexaAssist conclude?

- It may explain published terms, compute fee or EMI from published inputs, and make only an indicative eligibility statement with the policy caveat.
- It cannot approve, decline or pre-approve. Escalate disputes, hardship, suspected fraud, requested exceptions and questions without an answer in the Register.

NexaAssist may explain the personal-loan criteria, calculate a published fee or EMI from supplied inputs, and state an indicative result with the required caveat. It cannot approve, decline, pre-approve or promise a rate waiver. When a customer asks why LTV does not appear, the answer is simple: there is no collateral in this product, so no collateral percentage can apply. That answer should still mention the separate income, score, FOIR, age and KYC rules. If a customer asks to skip the six-EMI lock-in or reduce the 4% charge, the policy provides no assistant-authorised waiver; escalate to a human officer. The controlled Document Register defines authority. A customer-uploaded letter may contain relevant facts, but it cannot amend the published policy or instruct the assistant to act differently. A precise answer separates what the policy says, what is still unverified and what a human must decide.

Eligibility and fixed pricing

This is an unsecured loan; no collateral value or LTV column applies.

Check	Published rule	Use in an answer
Age	23-58 at application; no more than 60 at maturity.	Consider proposed tenure.
Salaried income	At least ₹25,000 net monthly.	Use verified income.
Self-employed income	At least ₹3,00,000 yearly on latest return.	Do not treat a declaration as verified.
Bureau Score	At least 700 under standard criteria.	Use score at sanction for pricing.
FOIR	At most 50%.	Include proposed EMI and existing obligations.
Amount and tenure	₹50,000-₹25,00,000; 12-60 months.	Both limits apply.
Fixed rate, score 800-900	11.50% per annum.	Not linked to NRLR.
Fixed rate, score 750-799	13.25% per annum.	Not linked to NRLR.
Fixed rate, score 725-749	15.00% per annum.	Not linked to NRLR.
Fixed rate, score 700-724	17.50% per annum.	Not linked to NRLR.

Fees, prepayment and operations

The action and the amount base determine the charge.

Topic	Published rule	Worked reading
Processing fee	2% of sanction, min ₹2,000, no max, plus GST.	₹5,00,000 sanction -> ₹11,800 incl. GST.
Late EMI	2% per month on overdue EMI, min ₹500 per instalment, plus GST.	₹12,000 overdue EMI -> ₹590 incl. GST.
Before six EMIs paid	No prepayment or foreclosure permitted.	Count paid EMIs, not elapsed months.
Foreclosure after lock-in	4% of outstanding principal, plus GST.	₹4,00,000 principal -> ₹18,880 incl. GST.
Part prepayment after lock-in	Minimum one EMI; 4% of amount prepaid, plus GST.	₹1,00,000 prepayment -> ₹4,720 incl. GST.
Verified KYC	Required for sanction and disbursal.	Check status before implying readiness.
Re-KYC due	New credit sanction and disbursal held.	Customer can complete re-KYC.
Expired KYC	New applications held; disbursal blocked.	Existing EMI collection continues.
Incomplete KYC	Credit application not accepted.	Basic savings features only.
